Spring 2020

TURF TIPS

Serving Northwest Ohio & Southeast Michigan since 1978

From the Owner

Dear Valued Customer,

Typically, I would pen this note with much anticipation. Warmer sunny weather is coming, flowers are just breaking ground and birds are migrating North. Lawns are greening up and insects are stirring. Walleye fillets have become a staple in many households. Even with all that, I don't need to remind everyone that this Spring is different.

First and foremost, Perf-A-Lawn is dedicated to the health and wellbeing of our cherished customers, valued coworkers and our community. Systems beyond the requirements of current regulations are in place to protect our employees and our customers. Please understand that Michigan and Ohio have enacted differing rules regarding what business services are essential. Ohio has allowed all our services to continue. Therefore, we will be able to complete all our services with no disruptions in Ohio.

Michigan has decided lawn care services are non-essential. Perf-A-Lawn provides Pest Control Services with Bug Ban Perimeter Pest Control, Mosquito Control and Tick Control Programs. These services are essential in Michigan so Perf-A-Lawn will continue to complete these services for our customers. Lawn care programs in Michigan will continue when the restrictions lift. Please remember that we will be able to control ALL weeds with post emergent products and we will be able to complete all of our programs when allowed.

Please continue to follow the recommendations that our leaders are asking us to implement, and respect social distancing when you see our employees. By all means, feel free to engage our specialists and ask questions so we can help you get the most out of your landscape. Your property is your sanctuary and you are likely going to be spending a good amount of time there!

We are asking all our customers that have an e-mail address to please provide that to us. Perf-A-Lawn is going paperless whenever possible.

Stay safe, love your people and enjoy your property. We soooo look forward to seeing you at a MudHens game!

Grub Preventative Program

The Life Cycle

Grub Damage

Home lawns in our area can suffer severe and extensive damage caused by Grubs (the larva stage of beetles). This damage is often very expensive to repair. The grubs feed on the root system of turf grasses, reducing the plant's ability to take in water and other nutrients.

▶ The Life Cycle

The adult beetles lay their eggs in the lawns during the summer months. As soon as the grubs hatch, they start feeding on the roots until cold weather drives them deeper into the soil. When warm weather arrives in the spring the grubs move back up to the root zone and resume feeding.

▶ Grub Damage

Grub damage can be identified by discoloration of turf during the early stages as the grubs feed. As this progresses into the later stages the grass can be lifted away from the soil like a fresh placed piece of sod.

▶ Grub Preventative

The Grub Preventative is designed to be applied before the eggs are laid. This hormone is taken into the plant and stored. When the grubs feed they take in the product, which causes them to pupate prematurely. Pupae have no feeding mouthparts so damage halts.

▶ Our Guarantee

We guarantee year long grub protection for your lawn when you schedule the Preventative Grub Control. If your lawn experiences grub damage we will kill the grubs and repair the damage at no additional charge.

Bug Ban

A Bug Ban Program at \$63.00 per application can protect your home from insects moving into your house. We spray foundations all around the home. Perf-A-Lawn technicians will spray under overhangs and around windows, doors and all possible entrance points. Bug Ban is great for spiders, ants, earwigs, wasps and any other creepy crawlies! Please call us today to schedule.

Refer a Friend

The best source we have for attracting new customers is you. That's right. We depend on our satisfied clients to spread the word to their neighbors, co-workers and friends. And when they do, we want to thank and reward them. Our referral program is simple. Just have your friend or neighbor mention your name when they call us. When they start on one of our regular programs, you'll receive a special bonus directly from us. Or, if you prefer, just call us and we'll take it from there. It's quick, it's easy, and we really appreciate the help in trying to grow our company and our business. Thank You!

\$20 Check Mailed to You per New 6 - Application Program
